Comments of Dr. Timothy A. Mousseau, KC4YCX

The FCC is to be commended for their progressive proposal to eliminate all Morse code testing requirements for all classes of Amateur radio license. I strongly endorse this motion and believe it will help to promote education and public service in the US. Many young people have been deterred from pursuing this technically challenging hobby because of the antiquated Morse code requirements. By removing this barrier, many more young people will take up this hobby and develop significant electronic, computer and telecommunications skills that will serve our society well in the future.
